

PUBLIC SAFETY NOTICE

RED RIVER FLOODWAY OFF LIMITS TO OFF-ROAD VEHICLES

For your safety and the safety of construction workers, please do not ride off-road or all-terrain vehicles (ATVs) on or near the Red River Floodway. This includes the popular recreational areas near Springhill Winter Park and the Outlet Control Structure in Lockport.

The entire floodway channel is an active and potentially dangerous construction zone. In addition, major construction activity is beginning on the west side of the channel opposite Springhill. This work will result in excavated floodway earth being deposited and used to fill the gravel pit that is frequently used by off-road and ATV riders.

As construction crews work to provide 1-in-700 year flood protection, please stay away from the floodway and help keep the construction site safe for you and for workers.
