ATTENTION SNOWMOBILERS

CONSTRUCTION IS UNDERWAY ON THE RED RIVER FLOODWAY

For your safety and the safety of construction workers, please do not snowmobile on or near the Red River Floodway this winter. This includes popular recreational areas such as Springhill and the Outlet Control Structure in Lockport. Please use alternative recreational areas and routes while floodway construction is underway.

Approximately 31 kilometres, or 64 per cent, of the floodway channel is under excavation or has been excavated. Work on the rest of the channel, from Springhill to Lockport, is underway, resulting in an active construction zone along the entire length of the floodway.

Construction workers and heavy equipment are on site at all times and hazards arise and change throughout the year. As crews work to provide a 1-in-700 year level of flood protection, please help to keep the construction site safe for you and for floodway workers by staying away from the construction area.

Thank you for your cooperation in keeping the construction site safe.

Remember – Ride Safe
